

I have been a subscriber for about a year. As a person that travels in the car a lot, I am a huge supporter of XM radio. It keeps me company and alert for those long stretches where regular radio is not even available. This is a "pay for" service the same as my cable, I do not want anyone telling me that I can't continue this service with my money.

I would much rather see you get involved with the not pay for service TV programs, take control of that filth and make improvements in that media. Thank you.
